

Sustainable Water for Agricultural Production

**Interested in swapping out your existing crops for those that use less water? The Rancho California Water District can help!**

Rancho Water's new CropSWAP program provides financial assistance to local growers who want to save water by converting high water use crops to lower water use varieties.

Rancho Water will be accepting applications beginning on November 14, 2016. Qualifying applicants can receive assistance of up to \$15,000 per acre converted, depending on the type of crop conversion and prior water use history.

For more information, call (951) 296-6920 or email [cropswap@ranchowater.com](mailto:cropswap@ranchowater.com)

For an application and a complete list of requirements, visit [www.ranchowater.com/CropSWAP](http://www.ranchowater.com/CropSWAP).
